ABOUT ME

I'm a self-taught web developer transitioning from a career as a commercial pilot. I've cultivated strong skills in Python, JavaScript, and React, building several projects to prepare for an entry-level role. My passion for problem-solving and learning mirrors my approach in aviation—reading documentation, asking insightful questions, and leveraging technology like AI. In my free time, I enjoy practicing jiu jitsu and swing dancing.

PROJECTS

PassionChocolates.com

A fully functional e-commerce platform built with React, Node.js, and PostgreSQL. Features include guest and user authentication (JWT), product reviews, Stripe payment integration, and deployment on AWS.

EvanPrograms.com

Personal portfolio website showcasing projects and skills. Built with Vite and React, using EmailJS for contact forms and hosted on GitHub Pages with a custom domain via AWS.

EDUCATION

Full Stack Open React Course

University of Helsinki's Comprehensive training in React.js and Node.js, focusing on modern web development practices.

University of Mary Washington

Bachelors of Sciences in Economics, 2010
